SKILLS

I'm proficient in **Photoshop**, **Illustrator**, and **Sketch** but I prefer to design in the browser as much as possible. I have intimate knowledge of **HTML5** and **SASS** (my favorite CSS preprocessor). When it's appropriatite, I employ **SMACSS**. I have a solid handle on vanilla **Javascript** as well as libraries such as **jQuery** & **D3**. I'm comfortable using MV* frameworks such as **ReactJS**, **BackboneJS**, **Angular**, and **KnockoutJS**, and believe that every tool has an appropriate time and place.
